

Submersible Jet Aerators

BER

BER/TOS-BER

SUBMERSIBLE JET AERATORS

FEATURES

The powerful single direction jet current is unrivaled in vertical stirring convection. And its required shaft power is not so much changed when the depth changes.

APPLICATIONS

- Pre-aeration and mixing at wastewater treatment plant
- Supplying oxygen to water in aquafarm

MAJOR COMPONENTS & SPECIFICATIONS

| | Model | Motor Output kW | Speed (r.p.m.) | Starting Method | Air Flow Rate* m³/h·m | Mixing Capacity m³/h | Max. Tank Dimension m | Water Depth m | Depth m | Free Standing Fitting | Guide Rail Fitting |
|------------------------------|---|-----------------|----------------|-----------------|-----------------------|----------------------|-----------------------|---------------|---------|-----------------------|--------------------|
| Air-inlet Bore mm | 25 | | | | | | | | | | |
| Treating Fluid | Wastewater and Sewage | | | | | | | | | | |
| Fluid Temperature | 0 to 40 °C | | | | | | | | | | |
| Impeller | Channel | | | | | | | | | | |
| Structure | Shaft Seal | | | | | | | | | | |
| | Double Mechanical Seal (with Oil Lifter) | | | | | | | | | | |
| Bearing * | Double-Shielded Ball Bearing | | | | | | | | | | |
| Impeller | Structure Steel + Nylon Coated | | | | | | | | | | |
| Materials | Gray Cast Iron | | | | | | | | | | |
| Casing | Gray Cast Iron | | | | | | | | | | |
| Shaft Seal | Silicon Carbide | | | | | | | | | | |
| Type, Pole | Dry Type Submersible Induction Motor | | | | | | | | | | |
| Insulation | 2, 4-pole | | | | | | | | | | |
| Phase | Three-phase | | | | | | | | | | |
| Protection Device (built-in) | Circle Thermal Protector | | | | | | | | | | |
| Lubricant | Turbine Oil (ISO VG32) | | | | | | | | | | |
| Frame | Gray Cast Iron | | | | | | | | | | |
| Shaft | Stainless Steel 403, 420 (1.5W and above) | | | | | | | | | | |
| Materials | 4x1.25 | 11.1 | 4x1.25 | 11.1 | 11.1 | 11.1 | 11.1 | 4 | 4 | 23 | |
| Cable | 4x2 | 11.8 | 4x1.25 | 11.1 | PVC | 6 | | | | | |
| Air-inlet Connection | Chloroprene Rubber (5.5W only) | 3.7 | 4x3.5 | 13.9 | 4x2 | 11.8 | | | | | |
| | Screwed Flange | 5.5 | 4x3.5 | 14.1 | 4x3.5 | 14.1 | 14.1 | 4x3.5 | 14.1 | Chloroprene Rubber | 8 |

* Available in stainless steel 304 upon request.

MODEL SELECTION

| Air-inlet Bore mm | Frequency Hz | Model | Starting Method | Air Flow Rate* - Water Depth m³/h·m | Mixing Capacity m³/h | Max. Tank Dimension m | Water Depth m | Depth m | Free Standing Fitting | Guide Rail Fitting |
|-------------------|--------------|---------|-----------------|-------------------------------------|----------------------|-----------------------|---------------|---------|-----------------------|--------------------|
| 25 | 50 | 8-BER4 | TOS-8BER4 | 0.75 | 3600 | D.O.L. | 11-3 | 22 | 3 | |
| 32 | 60 | 15-BER3 | TOS-15BER3 | 1.5 | 3000 | D.O.L. | 28-3 | 41 | 4 | |
| 32 | 60 | 15-BER3 | TOS-15BER3 | 1.5 | 3600 | D.O.L. | 24-3 | 40 | 4 | |
| 50 | 50 | 22-BER5 | TOS-22BER5 | 2.2 | 1500 | D.O.L. | 45-3 | 63 | 5 | |
| 50 | 50 | 37-BER5 | TOS-37BER5 | 3.7 | 1500 | D.O.L. | 80-3 | 94 | 6 | |
| 60 | 60 | 55-BER7 | TOS-55BER7 | 5.5 | 1500 | D.O.L. | 120-3 | 126 | 7 | |
| | | | | | | | | | | |

* The air flow rates are expressed at the standard condition.: Temperature 20°C, atm
* All weight excluding cable
Weights of guide rail fitting model excluding duct/foot bend

STANDARD ACCESSORIES

| Guide Rail Fitting | Silencer & Valve Set |

BER/TOS-BER SUBMERSIBLE JET AERATORS

The Tsurumi Submersible Jet Aerator, as shown in the figure, draws air in from the vicinity of jet nozzle by means of the water power discharged from the submersible pump. A mixture of air and water is then produced inside the diffuser. This mixture is pressurized just to the point where the pressure exceeds the water pressure around the ejection outlet, and then it forcibly jets into the surrounding water.

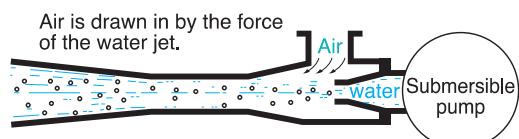

As a result, the ejected current is jetted in a single direction for a comparatively long range, enabling the generation of an extremely large churning effect.

Furthermore, even if the water depth fluctuates, the required shaft power hardly changes. The air quantity is freely adjusted as well. Because of this, the submersible jet aerator is also ideal as a aerator in equalizing tanks where the fluctuation in the water level is comparatively great.

A particularly large sales point is the fact that due to the air/water collision that occurs while the suction-induced air is in a minutely particulated, pressurized state, the oxygen dissolution efficiency is remarkably high.

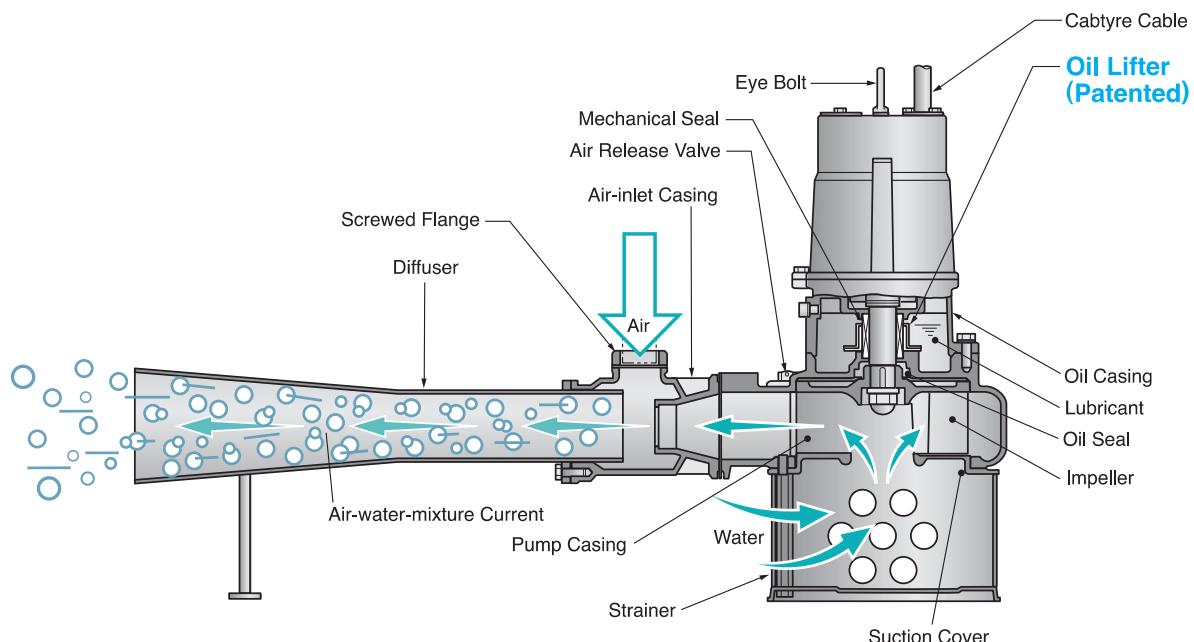

The principle of the jet aerator system

This system is a combination of a submersible pump and a jet pump. By the action of the ejection current of the submersible pump, a self-feeding force is generated, which draws air from the surface of the water through an air-inlet pipe. This air is mixed with the water and the mixture is ejected. The churning force caused by this ejection current is remarkably strong, with the result that exceptionally efficient oxygen dissolution is produced.

The mixture is pressurized to the point (exceeding the water pressure), where it can be ejected.

As a result, minute air bubbles and water are ejected in a pressurized state, enabling a large amount of oxygen to be dissolved in the water.

We reserve the right to change the specifications and designs for improvement without prior notice.
